DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Lichtman (5620459). Lichtman discloses a method of ratcheting the closure of a pair of jaws of an endoscopic grasping tool surgical instrument comprising the steps of: providing a pivotally mounted actuator handle (14) operatively coupled to the jaws (2), the handle having a drive head (36) which moves distally to effect jaw closure and said drive head having teeth (71) formed thereon; and providing a pawl (73) positioned for engagement with the teeth so as to prevent proximal movement of the drive head after it has moved distally (col. 9 lines 29-52).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lichtman. Lichtman teaches all of the limitations of the claims except the pawl comprising two tines of unequal length. It would have been obvious to one having

Art Unit: 3739

ordinary skill in the art at the time the invention was made to provide a second time, since it has been held that mere duplication of essential working parts of a device involves only routine skill in the art.

Response to Arguments

Applicant's arguments filed May 12, 2004 have been fully considered but they are not persuasive. Applicant argues that Lichtman does not disclose a handle that has a drive head, which includes teeth formed thereon. Applicant is directed towards reference (36) of the figures, which illustrates a drive head including teeth formed thereon.

Allowable Subject Matter

Claims 1-5 and 8-11 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
